Ainslie, D. S.

November 7th, 1917

TRIS IS TO CERTIFY:

This is to certify that Mr. D. S. Ainslie, M.A. is a Demonstrator in Physics in the University of Toronto, serving in charge of the Light Laboratory under Dr. Satterly. At present Mr. Ainslie is doing work for the University which in the judgment of the Professors in charge of the Department it would be impossible to secure any one else to perform. There are large classes in Physics which must be maintained and the great enlistment from the ranks of the students in the past three years has made it almost impossible to secure persons to undertake the work of demonstrators. We have already employed in this department all the available young women who are capable of filling the posts. The work that Mr. Ainslie is now doing is I judge of great importance to the University and to the country and it would be a misfortune were we compelled to drop it.

Mr. Ainslie has worked in the summer on his home farm of 300 acres near St. Mary's and has served as Demonstrator for us during the winter each year since graduation in 1915.

President.
